Our Program details
Holmesglen Institute in partnership with Skillinvest (Group Training Organisation) and the Local Learning Employment Networks are offering students a pathway to employment through a trade based apprenticeship program in Certificate III Civil Construction, located onsite at our Waverley Campus from September 2015.

Students will undertake both practical and skilled-based training in a fully supervised environment while undergoing a trade certificate in Civil Construction. The programs nominal duration will be up to 18 months with at least one day of work related training per week (on the job) and additional of the job training. Employment for this program will be offered through a Group Training Organisation (Skillinvest) and perspective host employers.

Pathways
Students who complete the apprenticeship program can explore fulltime work in a number of sectors including, Road & Infrastructure, Telecommunications, Parks & Gardens or go on to further training in related trades.

Benefits
School-based apprenticeships provide an excellent opportunity for students to begin a career while still at school, receive an industry recognised qualification and earn while you learn. All students have access to support personnel and case officers throughout the program. Our objective will be to transition students to ongoing employment and further Education.

How do I apply?
For further advice please contact your schools VET coordinator, VCAL coordinator, Careers advisor or Year level Coordinator.

REGISTER YOUR INTEREST EARLY AS PLACES ARE LIMITED!
