

Automotive @Skillinvest

At Skillinvest we offer flexible, on-the-job training for Apprentices in the Automotive trade

We understand the importance of flexible learning in today's business environment.

Our trainers will visit your apprentice in the workplace to deliver the Certificate III trade training that is required to successfully complete an apprenticeship in:

- **Light Vehicle Mechanic** (AUR30620-Certificate III in Light Vehicle Mechanical Technology)
- **Heavy Commercial Vehicle Mechanic** (AUR31120-Certificate III in Heavy Commercial Vehicle Mechanical Technology)
- **Parts Sales/Parts Interpreter** (AUR31020-Certificate III in Automotive Sales)

Instead of an external simulated environment, your apprentice will complete their trade schooling, facilitated by their Skillinvest trainer, on-site, incorporating the same live teaching examples they experience each working day.

Our on the job program is very popular with employers who prefer a model where they have consistent communication with their chosen training provider. We will ensure that as the employer, you are always up to speed with the progression of your apprentice's trade schooling.

If you have recently employed, or are about to employ an Australian Apprentice, you can nominate Skillinvest as your training provider of choice to deliver the training to your apprentice in your workplace.

Automotive @Skillinvest

How it works

When you sign up your apprentice to a registered training contract, inform your Australian Apprenticeship Network Provider that you would like your apprentice to train on the job with Skillinvest.

Once their Australian Apprenticeship contract is submitted and approved by the State Training Authority, Skillinvest will be able to commence the pre-training interview and the enrolment process on site with the employer and apprentice.

Our trainer will deliver the Nationally Recognised Units of the Certificate III Trade Qualification using the most up to date teaching methods. Our trainers are current and active in their trade, and bring an extensive amount of experience to our learners.

The apprentice will be visited by their Skillinvest trainer on a regular basis for their theory and practical training. The apprentice will also be set up with required theory and assessment tasks to be completed in the workplace setting in between training sessions. As the employer, you will be involved with this process so that their skills development in the workplace is in sync with their Certificate III level qualification throughout the duration of their apprenticeship.

**35 years experience
in the
apprenticeship and
trainee sector.**

About Skillinvest

With 35 years of experience in the apprenticeship and traineeship sector, we understand the unique challenges and opportunities of each employer and apprentice, and can provide knowledgeable and useful advice and support. We deliver on the job training to most of Victoria.

As a values-based, not-for-profit organisation, we aim to make a real difference and contribute significantly to the communities in which we operate. We have developed strong business, government and community partnerships and assisted thousands of young people to train successfully in their chosen trade.
